AUTISM SCREENING PROCESS

Hi there!

Thank you for reaching out about evaluating your child for an autism spectrum condition. To help us better understand your child's social communication, interests, and behaviors, we use the CAST (Childhood Autism Spectrum Test), a parent questionnaire that gathers valuable insights for the evaluation process.

We ask that you complete the parent form, sharing your observations of your child's behavior and the way they interact, play, and communicate in everyday situations. Because you know your child best, your responses give us important information to guide the next steps. If another parent or caregiver knows your child well and has helpful input, they are welcome to complete a form too.

Please answer each question based on your child's usual behavior. There are no right or wrong answers — an honest picture of how your child typically acts is the most helpful thing you can give us.

You can access the form by scanning the QR code below or visiting the URL. Just enter your child's name and date of birth to complete and submit the form electronically:

JoshNP.com/cast

Once we've received your form, we'll contact you to schedule a follow-up visit. During this appointment, we'll review the results together and discuss any next steps.

Thank you for trusting us with your child's care. We look forward to working with you to support their success and well-being.

Yours in Health,

Joshua LeJeune, FNP, PMHS

Nurse Practitioner, Pediatric Primary Care Mental Health Specialist
